<a href="#">SIR8</a>	Proposes to amend the Nevada Constitution to revise certain provisions relating to property taxes.	Ratti		Resolution to amend the Constitution to reset depreciation and abatements upon sale. (Dave says Assessors strongly opposed bc of inequities; Treasurers usually neutral but Tammi will check)(Dave:The constitution states that there should be uniformity and an equal rate of assessment. This resolution contradicts that statement. A resale home is the age that it is, and just because it has sold it loses its deprecation when the model match directly across the street maintains their depreciation because they did not sell is not fair or equitable. Instead of the depreciation being based on the structure, it's based on the person who buys the structure. Appeals, appeals, appeals for us. Possible System Updates / Office Policy We would have to make updates to our system to somehow maintain the original year built and remove all depreciation on these properties. Would it be on any sale or would they define it? What about a sale between parents to child(ren). I know it mentioned defining the term sale/transfer in the resolution, but how it is defined will leave us to interpret as best we can which properties would keep or lose their depreciation. Fair and equitable shows up again. Obsolescence By law, we cannot exceed full cash value. So removing the depreciation could possibly increase the value to go above the market value and we would have to applying obsolescence to bring the value back down anyway, so it would defeat the purpose of removing the depreciation. That is why I mentioned to you that since we assess annually, we have already determined a value for the fiscal year. Removing the tax cap only for that year would make more sense, not that I am advocating for this resolution. Commercial property is an issue because what happens when interests are sold and not the whole property. For example, if 49% of the interest in the property sells one year, 49% sells a second year, and 2% the third year, that property values would not be rebased, because the majority of the ownership didn't sell. Therefore, over a three year time period, the property sells but no taxes increase. This doesn't happen on residential property. The burden of the increases would be to the residential properties and this is a huge inequity problem they have in California. (Same issues in 2017)	Dead

<a href="#">SJR1**</a>	Proposes to amend the Nevada Constitution to revise provisions governing the taxation of minerals extracted in this State.		Oppose	CONSTITUTIONAL AMENDMENT (If passed by the Legislature in 2021, then will go to the voters in 2022) proposes the following amendments: Imposes a tax on the gross proceeds of minerals at a rate of 7.75 percent instead of the current rate on net proceeds that cannot exceed 5.0 percent, beginning for calendar years on or after January 1, 2023. Allows other taxes to be imposed on mines, mining claims, and the proceeds of minerals by removing the current provision that no other tax may be imposed upon a mineral, or its proceeds until the identity of the proceeds is lost and the restriction requiring mines and mining claims to be assessed and taxed as other real property is assessed and taxed. Requires 50 percent of the revenue from the 7.75 percent tax on gross proceeds to be used exclusively for a program that the Legislature shall establish by law that makes payments to eligible persons domiciled in Nevada on a yearly basis with the first payment being due on August 30, 2024, and subsequent payments made on the last Friday of August each year thereafter. The Legislature shall also establish by law the criteria, which a person must satisfy to be eligible for payments from the program. Removes the current requirement for the Legislature to distribute a portion of the revenue from the tax on minerals to local governments. Adds provisions that notwithstanding any other provisions of the Constitution, the Legislature can by: A majority vote of each house of the Legislature pass any provision of a bill that enacts or amends any law providing for the taxation of mines, mining claims, or the proceeds of minerals, if the provision creates, generates, or increases any public revenue in any form, including increasing the 7.75 percent tax rate.
