Notes

County populations are from vintage 2015 data provided by the Nevada State Demographer.

1Data reflects the causes of deaths that occurred between 2013 and 2015. Only Nevada residents are included in the data.

2Racial/Ethnic populations for each County were obtained from the Nevada State Demographer; vintage 2015.

3Income below poverty level (PL) was obtained from U.S. Census Bureau, 2011-2015 5-Year American Community Survey, Table DP03 – Selected Economic Characteristics

4Uninsured reflects individuals without insurance covered. Data was obtained from U.S. Census Bureau, 2011-2015 5-Year American Community Survey, Table S2701 – Health Insurance Coverage Status.

5Cancer incidence is reflective of the number of reportable cancers diagnosed in 2013 that were reported to the Nevada Central Cancer Registry.

6General Health indicators are collected from the Behavioral Risk Factor Surveillance System (BRFSS). All indicators reflect responses from 2011-2015, except mammogram, Pap test, and PSA test which reflect responses from 2012 and 2014 only. *Indicators with too few responses were suppressed due to reliability.

7“Currently Enrolled” is reflective of all individuals who were enrolled in July of 2017 within Medicaid, Supplemental Nutrition Assistance Program (SNAP), and/or Temporary Assistance for Needy Families (TANF) (Data as of July, 2017).

8“Newly Eligible” is reflective of individuals who are eligible because of the Affordable Care Act (ACA). These individuals fall into one of three categories: Parent/Caretaker, Childless Adult, and CHAP (eligible under ACA expansion).

9Nevada residents only are included in the data. Data provided from Nevada Vitals Statistics.

10Data reflects the births that occurred between 2011 and 2015.

11Low-Birthweight data reflects the births that occurred between 2011 and 2015.

12Infant mortality data reflects the deaths that occurred between 2011 and 2015.

13Teen birth rate data reflects the births that occurred in 2015.

14Persons Living with HIV indicate any person regardless of HIV staging, including HIV stage 3 (AIDS), living in Nevada at the end of 2015.

15Sexually transmitted diseases includes all individuals reported to have chlamydia, gonorrhea, primary and secondary syphilis, and early latent syphilis in MMWR Year 2015.

16Drug overdose deaths occurred between 2013 and 2015. This indicator excludes alcohol and tobacco related events.

17Emergency room visits and inpatient hospitalizations that occurred between 2013 and 2015.

↑↓Arrows reflect if County rates or proportions are statistically significantly higher or lower than Nevada rates or proportions for the same indicator.
