## Health and Health Care in Mineral County - 2024

Health and Health Care in Mineral County utilizes county-level data from the Robert Wood Johnson Foundation's County Health Rankings and Roadmaps project. This county profile was produced by the Office of Statewide Initiatives at the University of Nevada, Reno School of Medicine. The report includes the most current data available on health outcomes, as well as a wide-range of data on health factors influencing those outcomes. Data for Mineral County are benchmarked against state and national averages to highlight areas of strength and weakness in Mineral County.

## Strengths:

- In Mineral County, 93% of the population lived close to a park or recreation facility.
- Only 8% of motor vehicle crash deaths involved alcohol.
- There was one primary care physician per 920 people.

## **Challenges and Opportunities for Growth:**

- The average life expectancy was 67.8 years, lower than the Nevada Average of 77.0
- Of adults (18 or older), 37% have a BMI of 30 or greater.
- A score of 4.9 out of a possible 10 on the food environment index was given to the county, which
  includes access to healthy foods and food insecurity.

## **County Health Rankings and Roadmaps Model**

The County Rankings project emphasizes that a wide range of factors influence how long and how well we live, from education and income, to what we eat and how we move, to the quality of our housing and the safety of our neighborhoods. The model and associated rankings distinguish indicators or measures of health outcomes for today's health, as well as measures of health factors influencing tomorrow's health such as health behaviors, access to clinical care, social and economic determinants, and the physical environment.
